DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed on 11/03/2006, with respect to the rejection(s) of claim(s) 1, 2, 4-6 and 9-11 under 35 USC 112 second paragraph and 35 USC 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made as follow.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112 second paragraph, because there is insufficient antecedent basis for this limitation in the claim.

- Claim 2, the limitation "said first codec" in line 6 as recited is insufficient antecedent basis for this limitation in the claim since the "first codec" has not been introduced previously in the claim or depended claim 1.

Allowable Subject Matter

4. Claims 1, 4-7 and 9-11 allowed.

5. Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The following is an examiner's statement of reasons for allowance.

Art Unit: 2611

- The prior art fails to teach an apparatus of Claims 1 and 6 that specifically comprises the following:
 - The instant application is deemed to be directed to a non-obvious improvement over the admitted prior art of the instant application and the invention patented in Pat. No. US 4,661,946, US 5,303,191. The improvement comprises that "wherein said mixer further comprises a first buffer for receiving said converted input digital signal by the other of said two different modulation standards by said second codec means and a second buffer sharing an output terminal with first buffer for receiving said input digital signal modulated by said one of said two different modulation standards." as recited in combination with other limitation as claimed in claims 1 and 6, respectively.
